

We are Sri Lanka's premier private sector commercial bank. Our visionary journey has taken us beyond the realms of business as we have made a conscious effort to go where no bank has dared to go; from downtrodden villages long-forgotten, to the world across the shores. The driving force behind this epoch-making journey is our strong team of achievers, affectionately known as the Hatna Family. As we continue to make history and move ahead, we invite dynamic and ambitious individuals to join us in our trailblazing banking saga.

We are looking for bright minds to help us create a world of happy experiences.

CORE BANKING DEVELOPER

Job Role

To lead the implementation and delivery of innovative solutions while comprehending business requirements and developing effective technical solutions in HNB's Core banking Solution that align with HNB's business and platform strategies. To design and develop core banking components, assist in troubleshooting support incidents when necessary and participate in various stages of the SDLC.

Duties and Responsibilities

- Engage with business leads, product owners, and other stakeholders to gather and clarify requirements
- Develop and optimize SQL queries for performance and efficiency
- Create detailed technical diagrams that present the system architecture and data flows
- Participate actively in agile activities such as sprint planning, daily stand-ups, and retrospectives
- Incorporate security best practices into the development process
- Conduct regular code reviews to ensure code quality and adherence to best practices
- Provide prompt and effective technical support to users experiencing issues
- Promote the organization's culture across the team to ensure its alignment with the required and desired behaviors
- Instill a culture of continuous development and performance within the team
- Evaluate training and development requirements and make recommendations for learning interventions.

Educational Qualifications

- A Bachelor's Degree from a recognized university in the fields of Computer Science, Software Engineering, or a related technical discipline.
- Master's Degree in the fields of Computer Science, Software Engineering, or a related technical discipline will be an added advantage.

Work Experience

- Possess a minimum of 6+ years of work experience in Software Development, including experience in Core Banking System.

Competencies

- Software architecture and design
- Coding proficiency
- Agile methodologies and scrum mastery
- Business requirement analysis
- Troubleshooting and debugging
- Code quality and testing
- Stakeholder collaboration
