Market Research Analyst

Job Summary:

The Market Research Analyst will research and evaluate products and companies across multiple markets by collecting, comparing, and analyzing information from diverse sources. This role focuses on structured analysis and building clear evaluation frameworks to support strategic decision-making.

Requirements:

- 1-3 years of experience in market research or research-focused analytical roles
- Strong ability to find, assess, and validate information from multiple sources
- Analytical and critical thinking skills with attention to detail
- Ability to organize large volumes of information and draw clear conclusions
- Good English reading and writing skills
- Comfortable working with spreadsheets and structured research data

What You'll Gain:

- Hands-on experience in market research and structured evaluation
- Exposure to strategic decision-making and senior analysts
- Opportunity to build comparison and rating frameworks
- Professional growth in research, analysis, and strategic thinking
- Stable full-time role with clear research ownership
