Risk & Operations Analyst

Job Summary:

The Risk & Operations Analyst will support business growth by identifying risks, designing safe operational plans, and creating schedules that balance efficiency with risk control. This role focuses on analytical decision-making, structured planning, and maintaining operational stability.

Requirements:

- 1-3 years of experience in risk analysis, operations, or planning roles
- Strong analytical and logical thinking skills
- Ability to assess risks, define limits, and structure processes
- High attention to detail and sense of responsibility
- Comfortable working with spreadsheets and structured data
- Good English reading and writing skills

What You'll Gain:

- Hands-on experience in risk evaluation and operational planning
- Direct involvement in decision-making and business stability
- Exposure to strategy and operations collaboration
- Opportunity to grow into senior risk or operations roles
- Stable full-time role with clear ownership and impact
