CLOUD ARCHITECT

IT Department

We are seeking an experienced and forward-thinking Cloud Solutions Architect to lead the design, deployment, and management of cutting-edge cloud environments using platforms like AWS, Azure, or Google Cloud. In this role, the individual will play a key role in driving automation, enhancing security, optimizing performance, and shaping our digital transformation journey. If you're a strategic thinker with a passion for infrastructure as code, containerization, and scalable solutions, this is your chance to make a lasting impact.

Responsibilities:

- Design cloud architectures using platforms such as AWS, Azure, or Google Cloud, and manage the cloud infrastructure and services to align with the business needs of the bank
- Automate cloud resource management through infrastructure as code (IaC) tools, including Terraform and CloudFormation
- Implement cloud security best practices, which encompass identity and access management, encryption, and compliance
- Use of containerization and orchestration tools like Docker and Kubernetes for deploying applications in the cloud
- Optimization of cloud environments for performance, scalability, and cost-effectiveness
- Use of cloud migration strategies and assess, recommend, and implement appropriate solutions
- Maintain and regularly update documentation related to cloud architecture as needed

Candidate Prerequisites:

- A Bachelor's degree in Information Technology, Computer Science, or a related field from a recognized institution
- Certifications in cloud platforms, such as AWS Certified Solutions Architect, Microsoft Certified Azure Solutions Architect, or Google Cloud Certified - Professional Cloud Architect certification, would be a significant advantage
- A minimum 05 years of experience in IT, including at least 02-03 years focused experience on cloud architecture with a proven track record of successful cloud projects, including migration and optimization efforts, is expected
- Expertise in designing and implementing cloud-based solutions and services, such as virtual machines, storage, databases, and networking
- Proficiency in cloud architecture design and infrastructure as code (IaC) tools
- Strong problem-solving skills with a focus on efficiency, security, and cost management
- Ability to work collaboratively with development, operations, and security teams

Remuneration:

The successful candidates will be provided with an attractive remuneration package including fringe benefits, commensurate with industry standards.

If you are a results-driven IT professional looking for a challenging and rewarding opportunity, we invite you to apply for the position through our career portal before the deadline provided.
