

Supervisor Production Organic - Orugodawatte

KEY RESPONSIBILITIES

- Supervise factory workers and manage daily production activities.
- Ensure products are dispatched on time according to delivery schedules.
- Monitor production processes and improve efficiency where possible.
- Coordinate with other departments to ensure smooth operations.
- Assist with audits, inspections, and organic certification requirements.
- Maintain proper production and traceability records.

REQUIREMENTS

- Minimum qualification: Successfully passed the G.C.E. (A/L) examination.
- Minimum 6 months' experience in organic production or organic operations (mandatory).
- Basic knowledge of organic standards (EU, USDA, or local certifications) is an advantage.
- Good communication and organizational skills.
- Ability to work independently and as part of a team.
- Applicants below 25 years of age who are entering the agriculture industry are encouraged to apply.

The selected candidate will receive an attractive remuneration package, in keeping with the market standards.
