Manager-Software Business Analyst

RESPONSIBILITIES

- Lead and mentor Business Analysis team members while planning and overseeing BA delivery across multiple projects to ensure timely and high-quality outputs.
- Drive end-to-end requirements gathering, analysis, and documentation including functional and non-functional requirements, user stories, and acceptance criteria aligned to business outcomes.
- Collaborate with UX and engineering teams using tools such as Figma, wireframes, and prototypes to define solutions and recommend usability and digital experience improvements.
- Act as the bridge between stakeholders, developers, QA, and delivery teams by facilitating agile ceremonies, workshops, and supporting digital transformation initiatives using AI tools.

REQUIREMENTS

- 5-7 years of Software Business Analysis experience with at least 2 years in a lead or managerial role managing multiple projects and priorities.
- Bachelor's degree in Computing, IT, Information Systems, or a related field with postgraduate qualifications or BA certifications considered an advantage.
- Hands-on experience with BA artefacts, SQL, API testing tools, and strong exposure to web and mobile application delivery.
- Strong digital mindset with experience in digital platforms, transformation initiatives, and applying emerging BA, UX, and AI trends pragmatically.
