Then join an elite team of professionals at Epic and start ascending your career!

Senior Business Analyst

Key Responsibilities

- Actively play a vital role in business analysis activities including problem analysis, process modeling, stakeholder analysis, assessing and validating the solutions.
- Interact with the business stakeholders to gather and analyze all the business and system requirements by devising various requirements elicitation and analysis techniques.
- Review Solution Proposals, White Papers and technical artifacts including Software Requirements Specification (SRS), Software Design Document (SDD), Requirements Traceability Matrix (RTM), etc.
- Develop the Product Roadmap by closely working with the technology and business stakeholders.
- Analyze industry trends in the brainstorming process of future solutions.
- Engage in research and gap analysis activities to propose suggestions for the evolution of the product.
- Contribute to the conceptual design of the end solution and oversee the Proof-of-Concept (PoC) activities.
- Enhance the solution offerings and go-to-market strategies.
- Conduct client presentations, user training, and product walk-through sessions.
- Assist in the preparation of responses to EOIs, RFIs, RFPs, and RFQs.
- Actively engage to enrich the business analysis and product management processes.

Requirements and Competencies

- Minimum 3-4 years of experience in the Business Analysis discipline.
- Bachelor's Degree in Computer Science, Information Technology, Software Engineering, Information Systems or equivalent qualification from a recognized university.
- Sound knowledge of different industry-standard Business Analysis processes, techniques, and methodologies.
- Good PR and organizational skills and the ability to drive multiple products in parallel.
- Strong written and verbal communication skills in the English language and an outstanding level of interpersonal and presentation skills.
- Demonstrated experience and working knowledge on Product Management initiatives including Product Design Frameworks, Design Thinking, and New Product Development (NPD) practices.
- Prior experience working in the Banking and Financial Services Industry or its related operations will be an added advantage.
- Possessing a professional certification such as IIBA CBAP, PMI-PBA or IREB CPRE is highly preferred.

Opportunity

- Dealing with a diverse range of clients across the Banking and Financial Services Industry to play an instrumental role in engineering various ground-breaking to mission-critical FinTech solutions.
- Grasping the technology that revolves around the BFSI industry.
