# LOOKING FOR LEADERS

## MARINE WELDER

Ceyline Engineering Services (CES), part of the Ceyline Group since 1991, is Sri Lanka's leading marine engineering company. We are trusted by global ship owners and operators for delivering top-tier ship maintenance, repairs, and engineering solutions that keep vessels efficient and reliable.

We're looking for a Marine welder to join our dynamic team!

## JOB ROLE

- Perform welding and fabrication work on ships, vessels, and marine structures.
- Carry out MIG, TIG, and arc welding, as well as cutting tasks.
- Read and interpret technical drawings and specifications.
- Ensure welds are strong, durable, and meet safety and classification standards.
- Support vessel maintenance and repair activities as required.

## QUALIFICATIONS

- NVQ/ITI or equivalent certification in welding/fabrication.
- Hands-on experience in marine welding and steel fabrication (shipyard experience preferred).
- Proficiency in MIG, TIG, and arc welding techniques.
- Ability to read and understand engineering drawings.
- Strong knowledge of welding safety procedures and standards.
